The Signa range contains an exciting array of luminaires featuring the versatility of lightweight aluminium and acrylic. Each unit features a clear, illuminated acrylic panel, allowing the logo or text to be easily identified without being obtrusive. The use of acrylic effectively takes out the 'bulky' effect of past luminaires and the slim body shape completes the streamlined effect.

These identification signs (pictograms) are designed to compliment your range of emergency lighting. The Signa range can also be ordered with blank opal panels for individual user messages, eg. 'Julia's Fashions'.

The Signa's versatility will make this a popular choice for a wide range of commercial situations such as International Hotels, Shopping Centres, Business Headquarters, Hospitals, etc. Designed with two distinct profiles, the unit can be mounted on wall or ceiling in various situations, and is available in 8, 11 or 13 watt sizes.
